

## This is what Byggnads wants in the Plåt- och Ventilationsavtalet

- A wage increase of 4.2% and an increase in the extra pension allocation.
- Increase travel time compensation and car allowance.
- Clearer requirements for what should be included in your health check-up.
- Ability to wash work clothes at the workplace.
- Right to free sunscreen.
- Extra money to reduce wage loss when you take parental leave for child care (vab).
- Earn work time reduction (ATF) even during temporary parental leave.

## This is what Plåt & Ventföretagen want

- Allocate more of your working hours in some months and less in others – when it suits them.
- Lower starting salaries. Employees without education should be able to do all jobs at a lower wage.
- Reduce travel compensations. Employers want to deviate from agreed compensations and freeze the levels.
- Remove the possibility to work on piece rates. Employers want to decide themselves if you can work on piece rates.
- Make it harder for parents to take parental leave.
